

Danette Gosset

Greetings!

Summer is closing in fast even though some areas had snow recently. It won't be long now before we all will be wishing for cooler days.

The country continues to open up and more and more in-person events are taking place. We are working on many large events already for the late summer/early fall.

One of the biggest trends I am seeing is in Eco-friendly products. The pandemic shut downs made us all realize how what we do, use and don't use affects the Earth. More and more companies are looking to be more conscientious of their footprint on the planet.

There are more products made with recycled or sustainable materials than I have seen in more than 25 years in the business. There is clothing made from recycled plastic bottles and surprisingly soft. Or drinkware made from used, repurposed wine bottles and so much more.

There are also many retail brands that are now giving to great causes, proving financial contributions to nonprofits working for a better world.

If your company is committed to being more environmentally and socially responsible, we can help with eco-friendly and sustainable gift options. We can also help with eco-friendly packaging and mailings.

Let me know when you want to discuss your new call social responsibility objectives and programs. I am sure we can help you stand out!

Colorful Metal Pen
